

CATALOG HOUSES 2022

A photograph of a modern mobile home with dark grey vertical siding and a dark metal roof. The home has a large glass front door and a small porch area. It is situated in a lush green forest with tall pine trees. A small deck with two wicker chairs and a table is in front of the home. The text 'POLISH MANUFACTURER OF MOBILE HOMES AND MODULAR' is overlaid in white, bold, sans-serif font at the bottom of the image.

**POLISH MANUFACTURER
OF MOBILE HOMES
AND MODULAR**

JPJ MOBILE HOUSE

We are a Polish company that produces mobile and modular houses. Our projects are based on standards and concepts brought from Scandinavian countries.

The company was established on the basis of the experience of the company's President - Jacek Piasecki, who for nearly 25 years cooperated with leading producers of mobile and modular houses from Denmark, Sweden and Norway. Currently, the catalog includes 6 fixed models of mobile and modular houses, as well as individual productions.

The technology of open diffusion used by us, together with tight and solid insulation and adequate ventilation of the whole house, guarantees our clients an energy-saving and solid house for many years.

In addition to mobile and modular homes, our offer also includes sanitary modules, saunas and utility modules. We permanently cooperate with architects and designers who co-create all the designs of our structures.

We also offer full personalization of the order and production of the house according to the client's design. It's your home and you decide everything!

MOBILE HOUSES

Mobile homes are an extremely popular model of construction due to the implementation time, ease of making changes, minimum formalities and an attractive price.

It is a type of building ideal for any terrain. If your plot is located in a forest area, by a lake or where the area is wet - traditional construction may not be possible and a mobile home will be perfect there.

Each model of the offered mobile home has a solid, steel frame and a transport system.

Inside, the standard of finishing a mobile home does not differ from traditional construction. Walls finished with wainscot, panels or plasterboard. The house has plumbing, electrical and ventilation installations, as well as TV and internet installations. We supply houses fully equipped and furnished according to the customer's wishes.

The advantage of a mobile home is also the time of its implementation. Only 3 months pass from ordering to moving into a finished house!
